

# THM-0100

## SINGLE STAGE THERMOSTAT

This diverse single stage heating/cooling THM-0100 Non-Programmable Thermostat is also designed around PID algorithm theory and can also benefit applications requiring a single setpoint control.

A single on board external sensor input allows for floor, remote room or outdoor temperature sensing options.

In setpoint mode, the THM-0100 can be used to operate pumps, fan coils and other equipment.

### Features

- Single Stage Heating & Cooling Thermostat.
- Room, Floor & Dual Sensing Modes.
- Easy installation with the terminal block on the back plate of the thermostat.
- Includes 10' external sensor.
- Backlit visual graphic display.

### \* EXTRA \*

- The THM-0100 can also be set up as a single setpoint control (Heating or Cooling)
- In Setpoint Mode, the THM-0100 can be used to operate pumps, Fan Coils, & other equipment.
