Output at 190° F Supply, 170° F Return and 68° F Room Temperature

For outputs at different temperatures (and a complete list of available radiator sizes through DiaNorm by special order), please refer to the interactive Excel Spread provided for download under "Downloads" on our website:

<http://www.heatlines.com/downloads.html> (first list item under Purmo Dianorm Panel Radiators)

Open the downloaded file in Excel and type in the desired temperature in the yellow highlighted boxes on top of the spread sheet. Then hit "return" and the new results will be displayed in the table.
